According to NPT President & CEO, Kevin Massey, CPA...

"We work hard to provide the best customer experience possible and are always looking for areas where we can improve. These customer quotes help quantify our accomplishments, and I am pleased to be able to share them with the NPT team. I know firsthand the amazing work my team delivers and this shows that our customers appreciate it..."

"Tracking scholarships (ITA's) has been a problem for years. We were asking counselors to do accounting functions when we really needed them to do case management. While we were tracking the information, it was difficult to track it by fund source. It was difficult to track it as accurately as we wanted. Our counselors didn't know when a cost was more than they might have put on the ITA, so there was never a real connect between what they were assuming was the charge and what they had authorized, or with what was really billed and what was left if somebody dropped out. Thanks to Gazelle, our transactions are recorded automatically and in real-time. We now know where we stand financially at all times"

+

"With Gazelle in place, the Board has better control of the overall process and now has the capacity to deal with additional and new projects involving participant training and support services."

+

"Gazelle helped our agency with reporting accurate data to our stakeholders. The agency was able to track funds in one report which were encumbered, expensed, and/or available for a specific period or lifetime of the grant. This report helped in de-obligation choices which were beneficial to our participants and removed the guesswork of funds availability."

+

"The Gazelle system has been helpful to our Case Managers in that it helps us to track participant ITA information. By having this streamlined approach we are able to become more efficient and produce better results using this system. When I first saw the system and its capabilities, my first thought was it was going to create additional work, but once I started using I saw how much more effective I was going to be in my role. I'm now a raving fan of Gazelle."

+

"We have been using re-loadable debit cards for over 2 years, and our costs have been cut in half, if not more. Reports in Gazelle are easy to use and very helpful when ordering or processing debit cards, and Gazelle as simplified the process for both Program staff and Accounting"
